

ABOUT HALPIM

The Hungarian Association of Logistics, Purchasing and Inventory Management (HALPIM, or MLBKT in Hungarian) was established in 1991 to elevate and advance the profession in Hungary and assist professionals of the related fields in networking and training. Organisation and development of high quality courses is one of the core activities of the association.

By 2015, after two-years of development and restructuring, SCM Training Center has become the marketplace for our courses: www.scmtrening.hu. Course descriptions are available in English as well.

Thanks to the large professional network of HALPIM, both at national and international level, our Training Centre offers a lot more than courses. It is more like a learning programme for the whole length of one's SCM career. Logistics, purchasing and supply chain professionals may have access here to real practical knowledge that is based on most current theories and tested in corporate environment. At the same time, all participants can make use of the networking opportunities.

WHY US?

EXPERT TEACHING

Our instructors are experienced in teaching and also experts in their own fields with corporate and/ or academic background –expertise from experts

MODULAR COURSE STRUCTURE

Modules are independent and can be flexibly combined, offering long term training options.

CONSTANTLY UPDATED CONTENT

The course content is constantly being developed according to the corporate needs, business trends and changes in interaction with the companies

ACCESS TO TAILORED COURSES AT YOUR PLACE

Order a unique course according to your company's specific needs: tell us what you need and we will find the right expert to deliver that at your company's premises

DYNAMIC PROFESSIONAL NETWORK

The organisational background of HALPIM offers the possibility to connect to a professional community and take part in events and discourses led by the Association.

„The establishment of the SCM Training Center is a real turning point in the field of logistics courses in Hungary. HALPIM has been present in the training market for over 20 years, the purely logistics concept has been enhanced by the purchasing and supply chain management approach in the portfolio with paying attention to economic and technical aspects at the same time. This complex approach is indispensable to tackle corporate challenges nowadays.”

dr. Andrea Gelei, Vice-Chair for Education (HALPIM), Associate Professor (Budapest Corvinus University)

Gabriella Hajas, Training Manager, HALPIM
